Data-driven efficiency with SiteIQ

Industrial facilities, shutdowns and construction sites are complex environments to manage. Not keeping a handle on hire equipment, consumables and other services can cause safety failures, limit productivity and blow out your budget.

SiteIQ is Coates' next-gen proprietary site management system.

It provides faster real-time management of customer-owned and hired tools, equipment, consumables and services, along with business intelligence and intuitive reporting to optimise tool efficiency and better plan your next event.

INDUSTRIAL SOLUTIONS

How SiteIQ works

Available exclusively to Coates customers, SiteIQ replaces the legacy CHASE system. A superior and highly customer-focused site management solution, SiteIQ lets you drive efficiency at all stages of your project lifecycle.

Track
Track hired and/or owned assets and consumables anywhere and at anytime

Manage
Manage all hired and/or owned tools, equipment, consumables and services

Optimise
Access utilisation data to continually refine, understand risks and off-hire unused gear

Report
Create fully customised reports for any project element (eg. who used what tool and when)

Plan
Use data and insights to plan and inform future projects, reduce costs and align resources

Key features of SiteIQ

Access anytime
- A cloud-based solution for real-time management of tools, equipment, consumables and services

Track all assets
- Manage your entire owned and hired inventory, from mobile plant to individual consumables

Seamless scanning
- Fast and easy checkout and return of gear anywhere on site, with or without a Wi-Fi connection

Tailored to you
- Detailed reporting to help you understand costs, timings and utilisation to find efficiencies and savings

Quick reporting
- Streamlined reporting, project invoicing and admin so you can focus on critical operational tasks

End-to-end solution
- Sit back and let Coates manage all of your project assets through a fully managed, turnkey on-site tool store

Future-proofed
- Capable of integrating with new smart technologies as they become available

Benefits for your site

✓ Real-time visibility to reduce the cost and inconvenience of lost, damaged and stolen tools and equipment

✓ Detailed location and utilisation data to identify wastage and reduce unnecessary hires

✓ Increased traceability and accountability for the safe use and timely return of your tools and equipment

✓ Encourages more efficient and cost-effective hire behaviours across your contractor workforce

✓ Access to product certifications, documentation and VOC for improved site safety and WHS compliance

✓ Captures valuable data to inform the planning and delivery of future projects and events
