

Stay operational with temporary power & HVAC

When you need to power your site, control the climate or manage the temperature during industrial processes, reliability and performance are key.

Coates Power & HVAC specialise in temporary compressed air, power, climate control and process cooling solutions so you can keep production running without interruption.

Whether you need a temporary system, a short-term bridging solution or a long-term strategy, you can rely on Coates to provide a customised, turnkey solution for planned projects or emergency situations.

POWER & HVAC

Power of one provider

As part of Australia's largest equipment and solutions company, our specialist Power & HVAC team can take care of all your equipment, operation and maintenance needs.

From initial planning and design to ongoing maintenance and monitoring, we'll save you the hassle of dealing with multiple suppliers.

Discover our market-leading equipment

	Tools and equipment Access our extensive equipment fleet, nationwide logistics network, 24/7 field service and refuelling.
	Project management Minimise disruption and downtime with comprehensive planning and implementation support.
	Power generation Keep your site running with standalone or synchronising generators, fuel cells and more.
	Electrical cables & distribution Distribute power where you need it with marshalling panels, transfer switches, switchboards and cabling.
	Air compressors Work safely with diesel, electric, petrol and instrument-quality air compressors, tools, venturi pumps and fans.
	Chillers Let us manage all of your fluid chilling needs with our custom-built chillers and heat exchangers.
	Air conditioners Stay cool with our range of custom-built reverse cycle packaged air conditioning units.
	Heaters Heat indoor and outdoor spaces with our portable industrial heaters and air handling units.
	Fans Beat the heat or build a ventilation solution with our range of commercial and industrial fans.
	Dehumidifiers Control excess moisture and protect your plant and equipment with our industrial dehumidifiers.
